SEE YOUR FUTURE

BE YOUR FUTURE

A FOUNDATION FOR

OUR AREA'S YOUTH

MARION G. RESCH (1911-2004)

A graduate of The Rayen School and Lake Erie College, Mrs. Resch was always interested in education and the youth of the Mahoning Valley. She was a great philanthropist who generously supported many students and educational programs at local universities and colleges. Her husband, Paul, was a stockbroker and principal at Butler Wick & Co., Inc.

She recognized that the youth of our valley were the lifeline to its future. By acknowledging this fact, she created her foundation to enable area youth to reach their potential and become influential leaders in the community.

**This is her legacy.
This is The Marion G. Resch Foundation.**

The Foundation

Established in 2000, The Marion G. Resch Foundation is committed to assisting and developing the Mahoning Valley's number one resource, its Youth. The foundation is focused on promoting education in primary and secondary schools, trade schools and institutions of higher learning.

To achieve this end, The Marion G. Resch Foundation is engaged in two activities; namely, the granting of college scholarships and supporting early intervention programs designed to help high school students successfully cross the bridge to higher education.

Early Intervention

The early intervention programs are aimed toward students who have completed middle school. In the summer, before they begin high school, students are introduced to college via a residential campus experience exposing them to academics and enrichment activities.

When the students return to high school, their progress is monitored and they are tutored, as necessary. During the year, they often return to campus to further understand the myriad of opportunities afforded by a higher education.

FOUNDATION

Financial Aid

Financial aid is limited to students who reside in Mahoning, Trumbull or Columbiana Counties. They must be worthy and have proven their ability and desire to complete high school and obtain a college education or technical training. Students may contact the financial aid office of the institution to determine their eligibility for the award.

The selection of scholarship recipients is made by each Institution. Awards shall be the last dollar coverage after all other sources of financial aid have been exhausted.

The institution is required to provide the Foundation with the following information on all scholarship recipients:

- Name and residence address
- Evidence of academic qualifications
- Evidence of economic need
- Character and emotional maturity

The Foundation is anxious to cooperate with Colleges, Universities and Technical Institutions within a 100 mile radius of Youngstown in the sponsoring and funding of these educational opportunities for our Valley's youth.
