Take what you learned in the classroom and apply in “real world” situations.

An internship is a form of experiential learning that integrates knowledge and theory learned in the classroom with practical application and skills development in a professional setting. Internships give students the opportunity to gain valuable applied experience and make connections in professional fields they are considering for career paths; and give employers the opportunity to guide and evaluate talent. (NACE: National Association of Colleges and Employers).

Internships help students gain valuable work experience, develop good work habits, enhance your skills and apply what you have learned in the classroom into real world work settings. They introduce students to many aspects of full time work while allowing students to explore their interests, jobs within their major and envision themselves in future work. Students who complete internships gain a competitive edge in the always changing job markets!
