

Art Department Assessment Report 2014-15

Action Items From 2013-14 Assessment Report and Progress Made:

- We identified the Senior Seminar: ART 401 as the vehicle for assessing our department outcomes.
- We decided to assess all of our learning outcomes since there are only four
- We concluded that the senior seminar was not assessing all of our learning outcomes adequately. Listed below are our department outcomes from 2013-14. These are current as of 2014-2015.
 1. Students will have a comprehensive foundational experience in the visual arts
 2. Students will possess an aesthetic value system and critical skills necessary in creating and evaluating fine art
 3. Students will possess a basic knowledge of the history of art and the role of the arts in contemporary society
 4. Students will possess basic art making skills necessary for post-baccalaureate graduate study or employment in arts-related fields
- We identified strategies to help us better assess our outcomes, listed directly below.

Outcome #1

- ✓ we will ask the seniors the sophomore review questions again

Outcome #2

- ✓ Students will write an artist statement that in part addresses this outcome
- ✓ Ask students to do a written critique of a chosen work from the student show.
- ✓ Ask each student to orally critique a work from the student show. This response will be graded on the use of proper terminology, the ability to identify techniques and elements and principles of design, and whether or not the student can identify the work in the context of other artists' work or stylistic time periods.

Outcome #3

- ✓ Students are asked questions about the history of art in the sophomore review which in part addresses this outcome
- ✓ Ask students to provide a written answer to the question "What is the future of art and the role of artists in the world today?"

Outcome #4

- ✓ This outcome is adequately assessed using the students final resume and portfolio

- Consequently we decided to develop a "Senior Questionnaire" (attached) that would be handed out to the students during one of their final sessions after the senior exhibit has been hung. This form includes the following components:

The same 11 questions asked at their sophomore review

Question: What is the future of art and the role of artists in the world

today?

A prompt asking them to choose one work from the show and critique it

Action Items Completed in the Spring of 2015:

- In the spring of 2015 we decided to change question #12 which previously read “What is the future of art and the role of artists in the world today?” to “Name 5 potential careers for an art major”
- We gave the revised Questionnaire (attached) to the senior seminar students which they completed in class on April 21, 2015
- We composed a new rubric (attached) for assessing student responses to the Questionnaire, their artist statements, their portfolio and their responses during final critique.
- The three full-time Art Department faculty, Prof. Amar, Prof. McConnor and Dr. Lippert, randomly chose two completed Questionnaires to assess. Below are the results from the new assessment rubric. I am also attaching copies of the completed rubrics and the two Student Questionnaires which were assessed.

Student #1

<u>Outcome</u>	<u>Ranking</u>
Foundational experience in the visual arts	3, 3, 1
Aesthetic value system and evaluating art	3, 3, 1
Basic knowledge of art history and role of arts in society	4, 3, 4
Basic art making skills	4, 4, 4

Student #2

Foundational experience in the visual arts	4, 1, 4
Aesthetic value system and evaluating art	4, 4, 4
Basic knowledge of art history and role of arts in society	4, 4, 4
Basic art making skills	4, 4, 4

Summary of Assessment Results:

Based on these results our students appear to be either mastering or adequately learning the outcomes set forth. There are a few low spots dealing with the knowledge and use of specific terminology and the ability to identify artists, styles and time periods as well as a reluctance to offer effective and supportive feedback in critique.

Action Items for 2015-16 Academic Year:

- Change department outcome #3 from “Students will possess a basic knowledge of the history of art and the role of the arts in contemporary society” to “Students will demonstrate a comprehensive foundational knowledge of the history of art” for the sake of clarity and assessability.
- Rework the current rubric so that it better reflects what we are measuring.
- Better introduce and reinforce the use of specific terminology and identification of styles, artists and time periods. One way to do this might be that we require each art department

course to deliver an assignment specifically targeted at the Principles and Elements of Design as well as other specific terminology.

- Consider making question #13 (critiquing one work from the senior show) a stand-alone assignment rather than a component of the questionnaire. Make the description for this assignment more rigorous and ask that they employ terminology involved in Principles and Elements of Design, perspective, color scheme, proportion, etc.
