## Digital Breast Tomosynthesis (DBT) “3D Mammogram”

We have received many inquiries regarding Digital Breast Tomosynthesis (DBT), also known as a “3D Mammogram” and want to ensure that everyone understands their healthcare coverage in respect to this type of testing.

DBT / “3D Mammogram” is considered experimental/investigational and is not covered by your medical plan.

Commonly during patient registration various forms are required to be signed in order to “bill the insurance” including a waiver advising the patient that they are financially responsible for non-covered charges. **Please be aware you can be held financially responsible for experimental/investigational services which are not covered by your medical plan**, including but not limited to DBT / “3D Mammograms”.

If you have any questions about this notice, please feel free to contact The Reschini Group Customer Service Department at 1-800-442-8047.
