# Career CONVERSATION Alumni Panels

**Want to meet some Thiel graduates who now have exciting jobs or are leaders in their communities?**  
Join us at the Alumni Career Conversations Panels during Homecoming Week. Come hear about our alum's college to career experiences, where their career path has taken them and how Thiel helped them launch successfully into the real world.

## Panel 1: Your Skills Pay the Bills

Getting your degree and having a good GPA will be helpful in your graduate school/job search. But what other skills are needed to become successful leaders in the workplace and in your communities? Join these panelists to learn about what other skills they developed outside of the classroom and how to use your time at Thiel to develop your leadership skills and other skills needed in the workplace.

## Panel 2: Teamwork Makes the Dream Work

Are you wondering how to take your athletic skills off the playing field and into a professional field? This year at homecoming, we are welcoming a panel of successful Thiel alumni athletes who will share their career journey and talk about how their experiences as an athlete helped them get to where they are (and how you can take what you are learning on the field and apply them to your future job search).

## Panel 3:

### Getting out of your Thiel Comfort Zone

Does the thought of leaving Thiel cause you to feel excited, nervous, or overwhelmed? Do you take the first job offer you receive? Where should you live? How do you find what you are looking for? Join Thiel alum to hear their stories and get advice on how to effectively enter into, and excel in, the current workforce.

**Alumni-student Networking Reception to follow**
