

Thiel College Student Success:

The Career Development Center

The Career Development Center helps students launch into future careers or graduate school and prepares students to lead lives of meaning and purpose.

THIEL
Career Development Center

Develop the knowledge and skills needed to achieve your career goals.

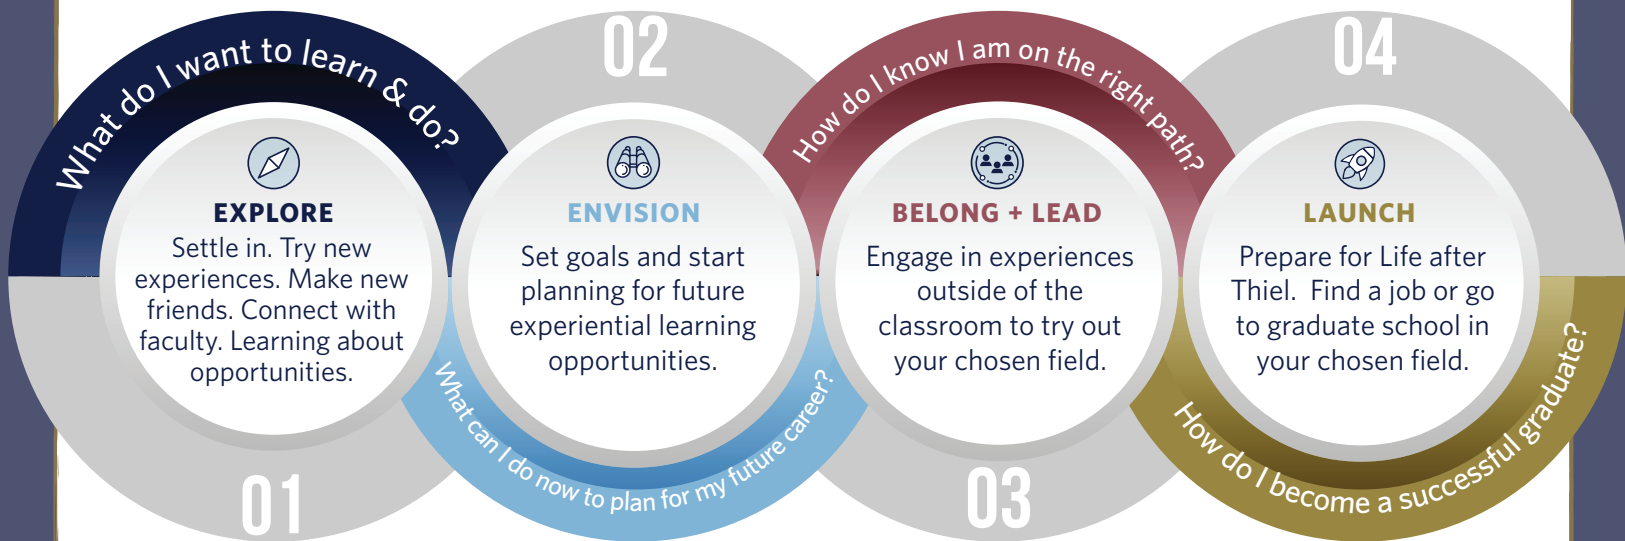

The career development center help students navigate tough questions:
What field of study is best for me? What can I do with a major in____?
How do I find internships and other opportunities to help me develop
essential job skills? What type of graduate program would be best for me?
How do my experiences help me achieve my future goals?

By engaging with career related programming inside and outside of the
classroom and following our 4 year Career Success Guide, students can
find answers to these questions and more as they launch into future
career and graduate school success.

career and graduate school

The Tomcat Way for Success!

We help students:

Create
**COMPETITIVE
CAREER RELATED
DOCUMENTS**
(resume, cover letter,
personal statement)

**EXPLORE
CAREER PATHS**
in their chosen field
of **STUDY**

Connect with
**THIEL
Alums!**

Find
**MEANINGFUL
EXPERIENTIAL**
learning opportunities

Develop
NACE
Career Readiness
COMPETENCIES

The Career Development Center helps students **explore** and **envision** themselves in future careers by providing ongoing career coaching, self-assessment and major/career exploration. We help students learn resume preparation, job search, interview skills and explore graduate schools.

We provide opportunities to network through on and off campus recruiting events, career/graduate school fairs, workshops and co-curricular opportunities. Students also have the opportunity to **belong & lead** by engaging in meaningful experiential learning activities like job shadowing, study abroad, internships, student teaching experiences, student employment and research projects to develop and enhance critical employment skills.

Through these experiential learning opportunities and self-reflection, students learn to articulate how these experiences shape them as they **launch** into their careers or graduate school.
