

Health Systems

Build the foundation for a future in healthcare.

Did You Know?

The Health Systems major gives students interested in healthcare a **broad, interdisciplinary foundation** in biology, chemistry, neuroscience, psychology, and ethics—while also keeping doors open to multiple career and graduate school paths.

Job Outlook

According to the U.S. Bureau of Labor Statistics, **healthcare occupations are projected to grow faster than the average for all careers through 2032**, driven by an aging population and increased demand for health services. Many roles within healthcare systems offer **strong job stability and competitive salaries**.

Career Possibilities

Graduates with a Health Systems degree pursue roles such as:

- Healthcare Program Coordinator
- Health Services Administrator
- Patient Experience or Care Navigator
- Community Health Manager
- Quality Improvement Analyst
- Medical Office or Practice Manager
- Health Policy or Advocacy Assistant
- Insurance or Benefits Specialist

Specialized Roles

It can also lead to specialized roles such as **Health Systems Analyst, Population Health Coordinator, or Healthcare Operations Specialist**. This major includes **many prerequisite courses** needed for graduate programs in:

- Occupational Therapy (OT)
- Physical Therapy (PT)
- Physician Assistant (PA)
- Medical School (DO/MD)

What makes Thiel's program different?

- **Interdisciplinary by Design:** A carefully structured curriculum that blends health sciences, psychology, ethics, and systems thinking.
- **Built for Flexibility:** Designed to simplify double majors with several complementary academic areas.
- **Hands-On Experience:** Apply classroom learning through internships, research, and community-based experiences.
- **Personalized Support:** Small classes and close faculty mentorship help students clarify goals and prepare for what's next.
- **Graduate-Ready Preparation:** Strong advising and academic support for students pursuing professional and graduate programs.
